REMOTE SURVEILLANCE MINI SENSORS

The **Remote Surveillance Mini Sensor** provides operators in rugged field environments a means of deploying unattended and covert sensing capabilities for individual or vehicle intrusions.

The Remote Surveillance Mini Sensor can process signals from seismic, magnetic or passive infrared detectors and transmit alarms in either voice or data messages.

The mini sensor is small, lightweight, and can easily be deployed as a single detector device. Tactical Support Equipment Inc. provides the sensors in an array of kit configurations that maximize their capabilities.

For specific information regarding kit configurations, contact sales@tserecon.com.

TSE Kit part numbers:

- TSE-PT-350-4
- TSE-PT-350-6
- TSE-PT-350-8
- TSE-PT-350-12
- TSE-PT-350-16

Available on GSA Schedule **GS-03F-0035S**

For more information, contact sales@tserecon.com

Features

- Easily deployed
- Adjustable for sensitivity
- Multiple uses
- Completely man portable
- Rugged and durable
- Adjustable for voice or data message alarms

GSA Advantage!® **GS-03F-0035S**

Specifications

Frequency Band:	138 – 174 MHz (Full MHz Band)
Transmit Output:	1.5 W
Detectors:	Seismic, PIR and Magnetic (Kit Options)
Operational Life:	6 Months Data Mode / 1 Month Voice Mode @ 100 Alarms per Day
Sensor Processing:	Animal Filter & Step Count
Radio Interoperability:	2-M VHF Commercial Receiver or Military MBITR 148 or PRC 152 Radios
Alerts:	Low Battery, Health Status, Tamper (Cable & Unit)
Power Source:	Two Lithium 9-Volt Batteries
Operating Temperature:	-20°C to +65°C
Immersion:	3 Feet
Size:	3.6"L x 3.1"W x 2"H
Weight:	2 Ounces with Batteries
